

Spring Forward

New Lines & Designs

The inevitable and much anticipated arrival of spring has inspired us to design and knit lightweight shawls and scarves. The shawls feature unique lace patterns and many are embellished with beads and other accents.

We also introduced a children's line in late February. The line features beautiful unisex knit beanies with fluffy pom-poms and beautiful cardigans for the most discerning of young wearers.

We are continuing to grow our home décor line using bright colors and chunky knits to create unique crocheted baskets. The baskets provide unique accents and storage in your home.

The Creative Process

One of our very favorite things about knitting and crocheting is choosing a color palette. The anticipation of waiting for the yarn to arrive is a close second. We invest a significant amount of time in selection of yarns and colors. The seasons, design of the piece as well as nature's palette are key considerations. Pinterest, style books, designers, images and even paintings have all been useful in our process.

Yarn selection follows and we strive for natural fibers as much as possible. We take the time to work with well-respected yarn producers from all over the world. We've thus far used yarns spun in Japan, Germany and Italy in addition to those produced locally here in the USA.
